PROFESSIONAL SUMMARY

Frontend Engineer with over 7 years of experience developing and maintaining web applications for internal products and client projects. Experienced in building dashboards, data visualizations, REST API integrations, and reusable frontend features. Skilled in feature development, debugging, unit testing, refactoring, and application maintenance while collaborating with Backend, QA, UI/UX, and Product teams in Agile environments.

TECHNICAL SKILLS

Frontend Development: JavaScript, TypeScript, React.js, Next.js, Vite, HTML5, CSS3, jQuery, EJS

State Management & Data Fetching: Redux Toolkit, Redux Persist, Zustand, TanStack Query

UI & Styling: Tailwind CSS, Bootstrap, Material UI, Ant Design, Radix UI

Maps & Geospatial: MapLibre GL, Leaflet.js, GeoJSON, H3.js

Backend, APIs & Database: Node.js, Express.js, REST APIs, PostgreSQL, MySQL/MariaDB, Drizzle ORM

Testing & Code Quality: Jest, Vitest, MSW, ESLint, SonarQube

Tools & Monitoring: Git, npm, New Relic, Datadog

PROFESSIONAL EXPERIENCE

Frontend Engineer | PT Bhumi Varta Technology

Nov 2018 - Present

Web Application

- Develop and maintain web applications for internal products and client projects using React.js, Next.js, TypeScript, and JavaScript.
- Contribute to frontend architecture and state management implementation using Redux Toolkit, Zustand, and TanStack Query based on application requirements.
- Build dashboards, data visualizations, and interactive mapping features using MapLibre GL and Leaflet.js, including geospatial data visualization and dynamic map layer management.
- Integrate frontend applications with REST APIs and coordinate with Backend teams on request and response structures, loading states, error handling, and various data conditions.
- Create and maintain unit tests using Jest and Vitest for components, custom hooks, and utility functions.
- Handle feature development, debugging, refactoring, code reviews, and technical documentation while collaborating with cross-functional teams in an Agile environment.

Selected Products & Client Projects

- Core products: LOKASI Intelligence and LOKASI Targetin.
- Internal project: LOKASI Datamark.
- Client applications: CELIA Location Intelligence for Telkomsel; customized LOKASI Intelligence implementations for Esteh Indonesia, FIF Group, and Honda Sales Operation; and Indonesia Bertutur for the Ministry of Education and Culture.

IT Support - NCC 119 | PT Infomedia Solusi Humanika (ISH)

Jan 2018 - Oct 2018

Ministry of Health of the Republic of Indonesia

- Developed an internal SPGDT 119 emergency contact directory web application that helped customer service agents find emergency service information across different regions.
- Prepared and reported operational data using CMS Supervisor, SPGDT, and Navicat while monitoring the Avaya call system.
- Performed system troubleshooting and server maintenance to support the availability of the national 119 emergency service.

Frontend Developer | PT Mardani Technology

Feb 2017 - Apr 2017

- Developed user interface components for a Java-based desktop application and integrated them with application functionality based on project requirements.
- Collaborated with team members during feature implementation, testing, and delivery.

INDEPENDENT PROJECTS

Pinternakan - Web Application

Developed a livestock monitoring and operational data management application. **Technologies:** Next.js, Tailwind CSS, Redux Toolkit, Ant Design.

Integra Design Consultant - Company Profile

Developed a company profile website presenting consulting services and project information. **Technologies:** React, Vite, TypeScript, Tailwind CSS, Ant Design.

EDUCATION

Bachelor of Informatics Engineering | Universitas Pembangunan Nasional "Veteran" Jakarta

2012 - 2017

Faculty of Computer Science | GPA: 3.04 / 4.00
